

corrosion resistance tables metals pdf

How to Prevent Metals from Corroding. Corrosion is the process by which metal degrades in the presence of various oxidizing agents in the environment. One common example of this is the process of rusting, during which iron oxides form in...

Thermoplastic. The Thermoplastic coating family offer coating that provide excellent wear, chemical, corrosion, and abrasion resistance. These coatings are great in applications where part protection, sound deadening and a more durable finish then a regular powder coat is needed.
