

nonlinear least squares for pdf

Non-linear least squares is the form of least squares analysis used to fit a set of m observations with a model that is non-linear in n unknown parameters ($m > n$). It is used in some forms of nonlinear regression.

Solve nonlinear least-squares (curve-fitting) problems in serial or parallel

Nonlinear Least Squares (Curve Fitting) - MATLAB & Simulink

The method of least squares is a standard approach in regression analysis to approximate the solution of overdetermined systems, i.e., sets of equations in which there are more equations than unknowns.
